

Maximize your

LM1600™ availability

GKN Aerospace Engine Systems develops and manufactures components for aircraft, gas turbines and rocket engines with high technology content in cooperation with the world's leading producers.

We offer an extensive range of services, including sales of spare parts for aircraft engines and aircraft, lease engine support, as well as overhaul and repair of aircraft engines and industrial gas turbines.

GKN Aerospace is a market-leading tier one supplier of airframe structures, engine components, transparencies and fuel/flotation systems.

Extensive engineering capability and focus on innovation has created technological and manufacturing leads in each of its areas of expertise.

More than 100,000 flights a day take off with GKN Aerospace technology on board.

GAS TURBINE SERVICES THAT YOU CAN TRUST

LM1600™ expertise

More than 50 years. That's how long our maintenance competence stretches back.

For the LM1600™ we have been an authorized service provider by GE since 1992. A vast experience we are using to the benefit of our customers.

Each gas turbine's operation is in focus, as we work together, maximizing availability while minimizing life cycle costs. A true partnership approach.

Complete services

We offer all levels of repair and overhaul, testing, spare parts, technical support, maintenance program optimisation and training.

To keep your operation going during workshop visits, lease and exchange engines are readily accessible.

All services and contractual solutions are tailored to your requirements. Time & Material or Long Term Agreements with availability guarantee; you choose.

Round-the-clock

When you need quick service, we are on standby. Troubleshooting, spare parts, on-site support or whatever you may need.

Our knowledgeable service engineers can perform everything from borescope inspections to Hot Section Exchanges on site.

In addition to our heavy maintenance facility in Trollhättan, Sweden, we have a service center in Zaragoza, Spain.

Approvals

- EN ISO 9001:2008
- AS/EN 9100C
- ISO 14001:2004
- Achilles JQS

Our certified staff is cleared for working offshore by several countries.

Capabilities

GE LM1600™ gas generator (SAC/DLE) and ELM 116/2 power turbine. Support for package and control systems.
